Most Costly Crop Famine.

The severe existing drouth is visiting the Commonwealth with the most costly crop famine in the history of Kentucky. Loss

Reports from all sections of the State give evidence of desolation and ruin visited upon the cornfields, tobacco lands and wide stretches of blue grass, made as if a destructive torch had been scene of peace and plenty.

The effect of the drouth which is viewed with greatest alarm in city and town in the tremendous ents, Mr. and Mrs. David Chrisincrease in the already high cost of living and consequent suffering that will ensue as a result of the complete failure of many staple farm products.

Pensions Allowed.

The State Confederate Pension Board met at Frankfort Tuesday and pessed favorably upon 237 applications for pensions. These will receive \$10 per month including back pay from the time they made application. Vouchers will be mailed to all pensioners Nov. 5th.

LJames Harrison is the only applicant from this county so far allowed a pension. The other applicants will be passed upon later.

The report comes from Lexington that Miss Reese Shimfessel, whose illness was reported in our last issue, has grown worse and that her trouble has developed a is in the city and expects to resevere attack of appendicitis, main here and in the county awhich means an operation.

Dick Smothers' House Burned.

The former residence of Dick Smothers, colored, who is now serving a life term in the penitentiary for the murde of Marshal A. T. Pettit, was burned to the ground about seven o'clock Friday evening last. The house is supposed to have been set afire, as it was unoccupied, the plunder of the condemned man still remaining with his property. There is no clue as to the guilty person or persons. For a few days before it hurned the front door was noticed standing open by several persons, and it probable that some one pillaged the house and then set lire to cover up their theft.

Natural Death.

A negro actually passed into the great beyond at the construction camp of Johnson & Briggs Saturday, by the natural death route, tuberculosis being the cause assigned. This is the first death from a natural cause ever reported from the construction camps, about twenty-five having been killed by explosions, cave-ins, personal encounters, etc. When the report was given out Sunday that a negro had died a natural death at one of the construction camps, the public refused to take it seriously until full proof was established. Sunday was the first time in many weeks that the county corwho had been killed by violence or by nn accident.-Winchester Democrat.

Sues for Heavy Damages.

Floyd Day, of the Day Lumber & Coal Co., this city, has sued Charles J. Doherty, at Louisville to recover \$42,880, alleged to be due as overcharges on 320 shares of bank stock in the First National Bank, of which Mr. Doherty was a director.

The petition sets out that Mr. Day purchased stock at \$140 per share, or \$64,000 for the whole amount, believing this to be its true value, exclusive of good will, because of alleged statements made in a report of the bank July 18, 1908, and sworn to by Charles J. Doherty.

The greatest factor in the spreading and growth or Christianity and enlightening of the world has been Mr. and Mrs. Edward Welch, of consecrated and Godly men and women working through the Church, making an organized effort that the whole world should know of the tragedy and victory on Calvary's Mo vain. The Church in proclaiming the gospel of the uplifted Christ through men and women for these centuries gone by has been the means of transforming this old world of ours. Men laid down their lives and sulfered martyrdom and history records awful persecutions of Christians in the early days because they would not renounce their faith. During the Dark Ages when the world struggled for twelve hundred years through terrible persecutions and blackest night of groping for the light the Church never faltered, and we are thrilled when historians tell us how martyrs stepped un-Eunice, Elbert and Willie C. When President Wilson ordered the Secretary of the Treasury to announce that from \$25,000,000 to \$50,000,000 would be deposited by the government in the banks a "big hit" with the farmers, then why not Kentucky? Heretofore under the Republican rale, "Wall Street" would squeal about shortage of money, and then large sums would be deposited by the Federal government in the Wall Street banks, and then they would lend the money to the western and southern banks, which in turn would loan it for crop-moving purposes. The high cost of living is brought about by high living on one hand, and on the other hand, a tendency of labor to quit farm work in favor of public works and railronding, thus transferring every year thousands of food producers into food consamers. If farmers must pay for labor as much per day (and they must do this if they keep their labor) us manufacturers and railroads, they will have to get even still more than they are now getting for their grain, their sheep, their hogs and cattle. This theep, their hogs and cattle. This premis still an increase in the cost of living from year to year. as the price of labor advances in the future, as it has advanced in the past.

This is a straight-from-the-Shoulder Typewriter Talk by a Typewriter Man to the Readers of The Clay City Times.

No other typewriter huilt-regardless of any claims made—is the equal of the new Fox Visible sold, but we claim for the new Fox Visible Typewriter that it is better than the best of these, and that its automatic features combined cannot be found in any other typewriter. The New Fox is a typewriter that will meet with the approval of the most critical user. A single demonstration will convince you--we will make it at our expense, if you will permit us.

Whether you have hid the use of a typewriter or not, you have paid for one many times over. Yes sir, we mean it; every day you continue using the old, slow method of writing with a pen you are unconsciously paying for a type-writer. The farmer who cuts his grain with a scythe pays with every drop of sweat for a reaper. If you are neglectful of your wearing apparel and expose yourself unnecessarily to the rain and cold you are paying for the very things that would have kept you well and comfortable. Remember this and mark it well: You must pay-puy -pay-for the necessities of this life, whether you use them or not.

THIS FOX IS THE NEW VISIBLE "BETTER THAN THE BEST OF ALL OTHERS."

Look at the illustration of our New Fox Visible Typewriter, shown above, and compare it with any other typewriter you have ever seen or used. Here is a really VISIBLE typewriter—note that the printing goint is on top in plain 1.7h1, and that the type bars rise from where they are lying and strike the platen in full view of the operator, and in a direct line of vision, and that all of what you have written remains in full sight until the paper is removed from the typewriter. Compare this with those old style typewriters, that some firms are still advertising as visibles, but on which the printing point is beneath the typebars, and you have to look down into them—or between them—to see what you have written. Touch a key in the keyboard and you change the color of your writing instantly from black, blue or purple to red. Press the Tabulator Key at the left (in front) for paragraphing, writing the complimentary closing, e.e.; also for all kinds of billing. At the right (in front) is our Back Space Key. This moves the carriage backward for making corrections, or putting in punctuation. This key also enables the operator to crase a word of three letters and write one of four in its place. Press the Steneil Key shown at the left (front) for making stenells from which thousands of duplicate letters can be made. Four rows of keys reduce the shifting one-third. The right Shift Key locks automatically for writing in all caps. A positive automatic Line Lock prevents you from writing beyond a predetermined line. The ribbon travels in a "zig-zag" line—not straight across from spool to spool as on others—thus using all of the ribbon and making it last three or four times as long as on other typewriters. The ribbon automatically re-winds itself from one spool to the other without any attention from the operator. Carriages are interchangeable, and run on ball bearing friends. Platens are removable, so that both a hard and soft platen—an be used on the same typewriter. Extremely light touch, "No falling leaf is lighter than the
